EDUCATION

February, 2022: Master of Engineering in Electronic Engineering. University of Nigeria

June, 2015: Bachelor of Engineering in Electronic Engineering. University of Nigeria

EMPLOYMENT

November, 2022 to Present: Contract Software Engineer at a financial services firm in Estonia (Cannot disclose company name due to a non-disclosure agreement).

- Built data pipelines capable of handling larger-than-memory data in Python and SQL.
- Modified existing software and achieved significant performance improvement. Sometimes rewriting performance critical portions of a solution in Cython or rust to ensure performance gains.

February, 2018 to November, 2022: Lecturer at the Department of Electronic Engineering, University of Nigeria.

- Taught undergraduate-level courses such as an introductory course in computer programming for sophomores, measurement and instrumentation (300-level course), and System Programming (300-level course) to over one thousand students
- Contributed to the development and maintenance of a result management system for the Department of Electronic Engineering
- Provided technical support for virtual and hybrid events of the Department
- Involved in the management of the Department's website.

PROJECTS

- **2022: Time and Attendance Management System (TAMS)**
I contributed to the development of an end-to-end biometric attendance solution for Nigerian Universities. The project is backed by The Tertiary Education Trust Fund (TETFUND) of Nigeria.

Technology Used: **Python, Django, Django REST Framework, LoRa, JavaScript, VueJS, CSS, Bootstrap**

- **2019-2022: ECE Exams Office (An internally used result management system)**
Was part of the team that designed the result management system for the Department of Electronic Engineering in University of Nigeria.

Technology used: **Python, Django, Bootstrap**

TECHNICAL SKILLS

- **Languages:** Python (6 years), SQL, JavaScript, C/C++, Bash, HTML/CSS
- **Frameworks:** Django, Django REST Framework, PyTest, Vue JS
- **Tools:** AWS, Docker, Git, SQL, PostgreSQL, REST, Agile, Linux, Nginx
